Exam questions   ● **Show all**   ○ Show wrong only

✓ **Question 1 of 35**

Katrina is an experienced Power BI service user. When would Katrina choose to work in Power BI Desktop instead?

> **to create dashboards for sharing**

> **to get data from an Excel file**

> ✓ **to perform data modeling**

> **to work in Power BI while online**

✓ **Question 2 of 35**

Which video types are the only ones you can add to a dashboard as a media tile?

> **YouTube or Pinterest**

> ✓ **YouTube or Vimeo**

> rest

Certificate shared.

Vimeo or Twitter

✓ Question 3 of 35

You have a filtered dataset for Customer Sales with some null value rows. You want to remove these rows completely. How will you do this?

⌄

Deselect (blank) in the pull-down menu for Customer Sales in the dataset.

Change the filter so null value rows are not displayed.

Place your cursor to the left of the rows, and then select Delete.

✓ **Deselect (null) in the pull-down menu for Customer Sales in the Power Query Editor.**

✓ Question 4 of 35

What will happen if you run Power BI with a display resolution lower than 1440 x 900?

⌄

Power BI will reduce the font size so you can see the tools.

✓ **You may not be able to see all the displayed content.**

Your text display setting will need to be changed to greater than 100%.

Certificate shared.

You will receive an error message to increase your display resolution.

✓ Question 5 of 35

What does the Unpivot feature in a dataset allow you to do?

Rename a column without affecting the data source.

Transpose the data so it displays longer vertically and not as wide.

✓ Retrieve the underlying rows of data from a pivot table

Trim your data, such as getting rid of leading and trailing spaces.

✓ Question 6 of 35

The dataset you are working in is a PivotTable. What will happen if you select the first column, Sales Region, then you click Unpivot Other Columns?

The other columns will change from rows of data to a PivotTable.

The column headings can be renamed however you prefer.

✓ The other columns will change from a PivotTable to rows of data.

Certificate shared.

> The other columns will change to rows, and the rows will change to columns.

✓ **Question 7 of 35**

In order to improve your dataset to get the most use from the Power BI Q&A feature, how should you name the tables in your data?   ⌄

> Do not use data models from Power Pivot.

> Avoid names that describe the table.

> Name your tables numerically.

> ✓ Choose user-friendly names for your tables.

✓ **Question 8 of 35**

When would you save and modify a sample report rather than create a new report from scratch?   ⌄

> when you do not have the information you want in the Fields list

> ✓ when the sample report contains most of the visuals you want

> when you do not have Power BI Desktop installed

> when you do not have access to the sample report

Certificate shared.

✕ Question 9 of 35

You are creating a visualization. The first column you select from the
Fields list has a globe icon next to it. The next column selected does not
have an icon next to it. In which type of visualization will the second item
appear?

as a column chart

✓ as a map

✕ as a table

as text

✓ Question 10 of 35

If you create an app workspace, how do the collaborators you selected
create their own reports and dashboards?

They are created by emails sent to you for approval.

✓ They are created the same way you created them in My
Workspace.

They are created in an offline version of My Workspace.

They are created as drafts posted to your workspace for
approval.

Certificate shared.

✓ **Question 11 of 35**

You found a thermometer in the Marketplace that you think will add more
value to your visualizations than the gauge you are using. Which values
will you have when you add the thermometer? ⌄

All the values contained in the Visualizations pane in Power BI.

✓ The values that are included in the thermometer you add from
the Marketplace.

All the values in the Fields list generated from the dataset you
used.

The values that were in the gauge you used before you
downloaded the thermometer.

✓ **Question 12 of 35**

After you created an app workspace, you offered the app to your entire
sales department for feedback. Which version of the app will those users
see when they access the app? ⌄

The version you published, updated with any changes added in
real-time.

The version you published, along with a second version
containing updates.

✓ The version you published, until you or a collaborator choose
to update again.

The version you published until you as the app owner choose to

Certificate shared.

✓ Question 13 of 35

You decide the dashboard you created is not in the order you would like them to appear in the final report. How can you rearrange the pages?

> Temporarily delete the out-of-order pages, then restore them as you order your pages.

> ✓ Use the drag-and-drop feature to arrange the pages in the order you would like them to appear.

> Rename the pages so they are in the order you would like them to appear.

> Use the previous and next page buttons to move the pages where you want them to appear.

✗ Question 14 of 35

You are an independent contractor, so you do not have an organizational email address. Can you still sign up for a Power BI trial subscription?
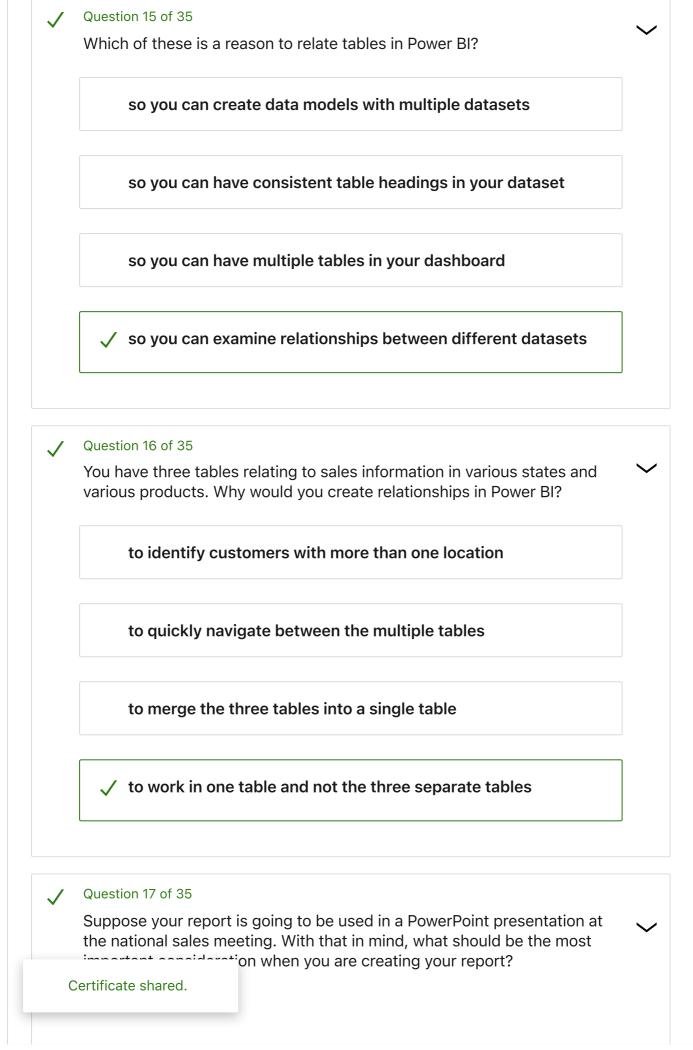

> ✓ Yes, you can get a trial subscription to Microsoft 365, and then use that account to sign up for a Power BI trial.

> No, unless an officer of the organization you are contracted with contacts Microsoft to approve your request.
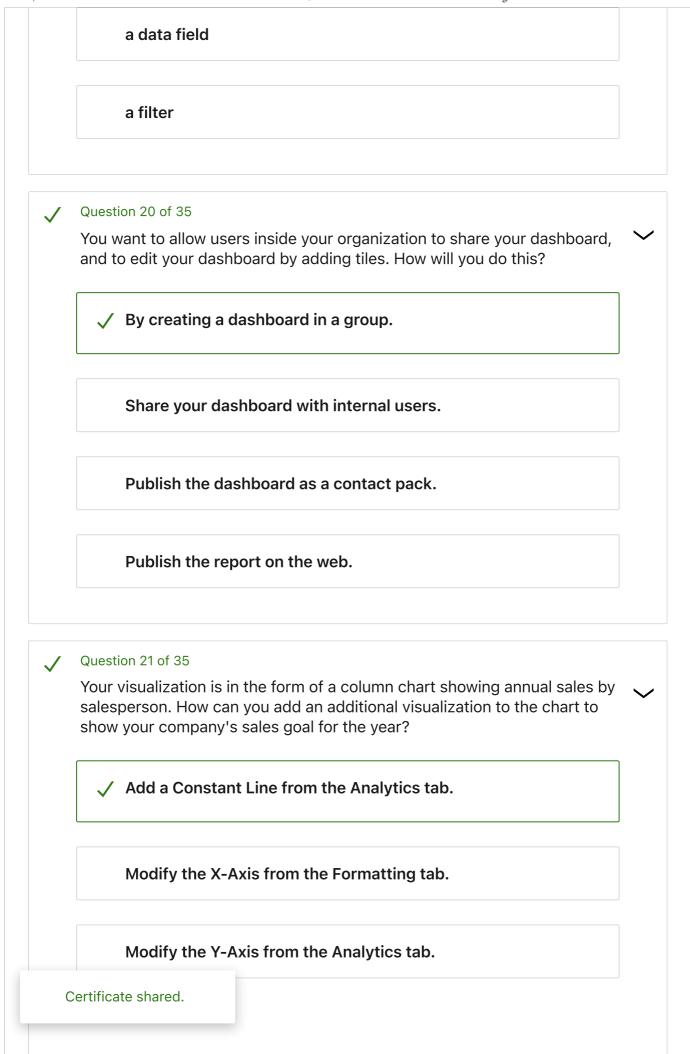

> No, because Power BI is limited to individuals with organizational or educational email addresses.

> ✗ Yes, because a trial subscription for Power BI does not have the organizational email requirement of a full subscription.

Certificate shared.

✓ **Question 15 of 35**   ⌄

Which of these is a reason to relate tables in Power BI?

> so you can create data models with multiple datasets

> so you can have consistent table headings in your dataset

> so you can have multiple tables in your dashboard

> ✓ so you can examine relationships between different datasets

✓ **Question 16 of 35**   ⌄

You have three tables relating to sales information in various states and various products. Why would you create relationships in Power BI?

> to identify customers with more than one location

> to quickly navigate between the multiple tables

> to merge the three tables into a single table

> ✓ to work in one table and not the three separate tables

✓ **Question 17 of 35**   ⌄

Suppose your report is going to be used in a PowerPoint presentation at the national sales meeting. With that in mind, what should be the most important consideration when you are creating your report?

Certificate shared.

how many visualizations you can fit on a PowerPoint page

how to have charts rather than tables appear on different pages

how long it will take to export your report to PowerPoint

✓ how you are going to group elements on a page

✓ **Question 18 of 35**

What is displayed in the Power BI Data Hub?

All Power BI content in the current workspace

Only Power BI semantic models in the current workspace

✓ Semantic models, including endorsed models

Semantic models you have permission to use

✓ **Question 19 of 35**

When you pin a visualization from a report to a dashboard, what does the visualization become?

✓ a tile

Certificate shared.

a data field

a filter

✓ **Question 20 of 35**

You want to allow users inside your organization to share your dashboard, and to edit your dashboard by adding tiles. How will you do this? ⌄

> ✓ **By creating a dashboard in a group.**

Share your dashboard with internal users.

Publish the dashboard as a contact pack.

Publish the report on the web.

✓ **Question 21 of 35**

Your visualization is in the form of a column chart showing annual sales by salesperson. How can you add an additional visualization to the chart to show your company's sales goal for the year? ⌄

> ✓ **Add a Constant Line from the Analytics tab.**

Modify the X-Axis from the Formatting tab.

Modify the Y-Axis from the Analytics tab.

Certificate shared.

Add a Constant Line in the Formatting tab.

✓ Question 22 of 35

When you imbed a Power BI report in SharePoint Online, what are you actually doing?

imbedding the report as a website

adding a site page by pasting the report link

✓ adding a web part by pasting the report link

imbedding the report as a navigable presentation

✓ Question 23 of 35

In which situation would you have a higher-value visualization in terms of performing data analysis with a treemap rather than with a pie chart?

✓ You want to look at a higher level of detail in a category.

You want your legend to wrap in the content area.

You prefer to have the data displayed in the form of a table.

You want to distill your data into categories.

Certificate shared.

✓ Question 24 of 35

What feature does Power BI for Mobile have to make sharing Power BI dashboards easier than sharing other types of information with a mobile device?

⌄

> ✓ **Power BI for Mobile can share dashboards via sharing apps directly from the screen.**

> **Power BI for Mobile includes an annotation feature.**

> **Power BI for Mobile takes its own screen captures.**

> **Power BI for Mobile allows you to save the dashboard as a link.**

✓ Question 25 of 35

When you edit interactions, you choose to not have the data filtered. Once you stop editing the interactions, what happens when a user selects an item?

⌄

> **The charts change, but the tables do not change.**

> **The tables change, but the charts do not change.**

> ✓ **The tables and charts redisplay, but nothing changes.**

> **The inability to filter is displayed as an error message.**

Certificate shared.   ⌄

er BI impact an organization's IT resources?

✓ **IT professionals can spend their time providing data to analysts rather than creating reports.**

The IT department will be the primary resource using Power BI.

The IT department will be responsible for creating visualizations with Power BI.

IT professionals can spend their time creating reports rather than providing data to analysts.

✓ Question 27 of 35

When would you use Power BI service rather than Power BI Desktop?

✓ when you are creating dashboards

when you are doing data modeling

when you do not have the mobile app

when you are creating reports

✓ Question 28 of 35

How can you create portable reports?

Get your data with Power BI Desktop, and then download the CSV file.

Certificate shared.

Create the report in Power BI service, and then work with it in Power BI Desktop.

✓ Create the report in Power BI Desktop, and then work with it in Power BI service.

Get your data with Power BI service, and then download the PBIX file.

✓ Question 29 of 35

You would like a visualization that shows how much of your third quarter sales goal has been reached. Which visualization will you choose?

a filled map

a tree map

a waterfall

✓ a gauge

✕ Question 30 of 35

The Sales Manager has moved Pennsylvania from the Midwest Region to the East Region. How can you change the regional sales data so your dashboard reflects the new data?

Update the data in Excel, then upload to the Pin Manger under the Power BI tab in Excel.

Certificate shared.

✕ **Update the data in your Excel table, then click Refresh.**

Update the data on the table in your dashboard, then click Refresh.

✓ **Update the data through the Pin Manager under the Power BI tab in Excel.**

✓ Question 31 of 35

Juan Delgado is an employee in your sales department and Li Park is an outside consultant. If you share a dashboard with both of them, will there be any difference in their Power BI experience?

Both Juan Delgado and Li Park will only be able to see the dashboard in a browser and not any of the elements on the left.

✓ **Li Park will have the interactivity of the dashboard, but she will not have any of the elements on the left.**

Li Park will not be able to view the dashboard because she is not in your company's domain.

Both Juan Delgado and Li Park will have the same experience if they both have Power BI installed.

✓ Question 32 of 35

How will a gauge visualization provide impressive one-glance information on your company's sales for the year?

Certificate shared.   at percent of salespeople are on track to reach

It can show the salespeople who have the highest sales for the year.

✓ It can show how close your sales are to your sales goal.

It can show how each salesperson is "gauged" against the other salespeople.

✓ Question 33 of 35

Why would you add a slicer in a table visualization?

so your users can slice-out data they are not interested in

so the slices in a pie chart can be compared to a particular goal

✓ so your users can filter the particular data they are interested in

so the data in each slice of a pie chart will show the underlying data when clicked on

✓ Question 34 of 35

Why would you create an app workspace?

✓ so you can have collaboration in creating and sharing data, reports, and dashboards

Certificate shared.   rators can access the app workspace from a

so you can assign individuals to view the Power BI content you share

so you can limit these individuals who have admin authority over the workspace

✓ Question 35 of 35

You have a slicer and a chart on the same page for your sales data by state. If you use the menu to sort by territory in alphabetical order, what effect will that have on the slicer and the chart?   ⌄

The slicer will be sorted alphabetically by territory, but the chart will be unchanged.

✓ Everything on the page will be sorted alphabetically by territory.

The chart will be sorted alphabetically by territory, but the slicer will be unchanged.

Only text items will be sorted alphabetically by territory, but chart items must be sorted separately.
